Allowing the granting of easements on state-owned aquatic lands for local public utility lines.

#### (DIGEST OF PROPOSED 1ST SUBSTITUTE)

Finds that local utility lines must cross state-owned aquatic lands in order to reach all state residents and that, for the benefit of such residents, the state should permit such crossings, consistent with all applicable state environmental laws, in a nondiscriminatory, economic, and timely manner.

Provides that the department may recover only its reasonable direct administrative costs incurred in processing and approving the request or application, and reviewing plans for construction of public utility lines.

Provides that the use of state-owned aquatic lands for local public utility lines owned by a nongovernmental entity will be granted by easement if the use is consistent with the purpose of RCW 79.90.450 through 79.90.460 and does not obstruct navigation or other public uses.

Declares that nothing in this act limits the ability of the department to obtain payment for commodity costs, such as lost revenue from renewable resources, resulting from the granted use of state-owned aquatic lands for public utility lines.

Provides that the charge for the term of an easement granted under RCW 79.90.470(2) will be determined as follows and will be paid in advance upon grant of the easement: (1) Five thousand dollars for individual easement crossings that are no longer than one mile in length;

(2) Ten thousand dollars for individual easement crossings that are more than one mile but less than five miles in length;

(3) Fifteen thousand dollars for individual easement crossings that are at least five miles but less than fifteen miles in length; or

Developing a comprehensive prescription drug education and utilization system.

(DIGEST OF PROPOSED 1ST SUBSTITUTE)

Declares an intent to develop a comprehensive prescription drug education and utilization system in Washington state that will ensure best prescribing practices and pharmaceutical use, reduce administrative burdens on providers, increase consumer understanding of and compliance with appropriate use of prescription drugs, help to control increases in consumer and state health care spending, and improve prescription drug purchasing through a sound evidence-based process that evaluates the therapeutic value and cost-effectiveness of prescription drugs.

Requires the administrator, in concert with other state agencies involved in state purchased health care, to begin implementation of a preferred drug program by January 1, 2003.

Declares that the preferred drug program is initially limited to fee-for-service prescription drug purchasing through medical assistance programs under chapter 74.09 RCW, the uniform medical plan under chapter 41.05 RCW, and other state purchased health care programs.

Requires the administrator to include bulk purchased prescription drugs in the preferred drug program according to a timetable of the administrator's choosing. The preferred drug program shall not be applied to health care purchased through managed care contracts with carriers.

Provides that, to complement the preferred drug program established in section 4 of this act, the administrator must, in concert with state agencies involved

in state purchased health care: (1) Implement a program of academic detailing and client counterdetailing that educates physicians and other prescribers, and clients of state purchased health care, on the cost-effective utilization of prescription drugs on the preferred drug list;

(2) By July 1, 2004, use electronic drug claims processing and information retrieval systems to analyze pharmacy and medical claims to identify those prescribers who request that prescriptions for nonpreferred drugs be dispensed as written on a more frequent basis than their peers, and provide information and education to those prescribers as needed to improve the system and prescribing practices; and

(3) Conduct a feasibility study of developing a system to periodically provide a complete drug profile of persons covered through state purchased health care systems to health care providers caring for those persons.

Requires the administrator to design, in concert with state agencies involved in state purchased fee-for-service health care, a uniform drug utilization review program for state purchased health care that meets the requirement of Title XIX of the social security act. Each state agency that purchases or provides health care services must adopt the uniform drug utilization review program for its fee-for-service purchasing and may implement it directly or by contract or interagency agreement.

Authorizes the administrator to engage in consolidated prescription drug purchasing. The authority granted the administrator by this provision shall be liberally construed to achieve the purposes of this act.

Requires the administrator, in concert with agencies involved in state purchased health care, to design and implement at least two, but not more than five, pilot disease management programs for persons covered through state purchased health care programs. The programs must begin operation by July 1, 2003.

Requires any savings to health care benefit programs administered by the public employees' benefits board that result from implementation of the prescription drug education and utilization system under this act to be deposited into the public employees' and retirees' insurance account established under RCW 41.05.120. In developing its annual budget proposal for public employee health benefits, the administrator must consider the extent to which implementation of the preferred drug program has moderated increases in public employee health benefit costs and attempt to reflect that moderation in employee cost-sharing.

Provides that, by January 1, 2003, the administrator must submit to the governor and the health care and fiscal committees of the legislature a progress report regarding the implementation of the prescription drug education and utilization system. The report must include a description of the extent to which the evidence-based review has been incorporated into the preferred drug list, and any prior authorization policies or procedures that have been developed.

Facilitating the convicted offender DNA data base.

(DIGEST OF PROPOSED 1ST SUBSTITUTE)

Finds that DNA data bases are important tools in criminal investigations, in the exclusion of individuals who are the subject of investigations or prosecutions, and in detecting recidivist acts.

Declares it is the policy of this state to assist federal, state, and local criminal justice and law enforcement agencies in both the identification and detection of individuals in criminal investigations and the identification and location of missing and unidentified persons.

Finds that it is in the best interest of the state to establish a DNA data base and DNA data bank containing DNA samples submitted by persons convicted of felony offenses and DNA samples necessary for the identification of missing persons and unidentified human remains.

Finds that the DNA identification system used by the Federal Bureau of Investigation and the Washington state patrol has no ability to predict genetic disease or predisposal to illness. Nonetheless, the legislature intends that biological samples collected under RCW 43.43.754, and DNA identification data obtained from the samples, be used only for purposes related to criminal investigation, identification of human remains or missing persons, or

improving the operation of the system authorized under RCW 43.43.752 through 43.43.758.

Provides that every sentence imposed under chapter 9.94A RCW, for a felony specified in RCW 43.43.754 that is committed on or after the effective date of this act, must include a fee of one hundred dollars for collection of a biological sample as required under RCW 43.43.754, unless the court finds that imposing the fee would result in undue hardship on the offender.

**HB 2928** by Representatives Linville, Sehlin and Pflug

Ensuring state payment for long-term care services.

Finds that quality care cannot be assured by state mandates alone. Sufficient resources must be dedicated to long-term care services to facilitate competitive salaries that will attract and retain quality caregivers.

Recognizes that past failure to provide such resources has contributed to caregiver recruitment and retention problems in all long-term care settings. These problems can only degrade the continuity and quality of care for those persons dependent upon such care.

Finds that state government has assumed the responsibility of purchasing long-term care services for a large proportion of those receiving such services.

Finds that to ensure that state government's expectations concerning the quality of long-term care services are met, its payments for those services should be fair and reasonable and adequately compensate the current costs incurred in providing those services.
